---

**Project Title:** Mumbai Explorers

**Institution:** CDAC

**Duration:** 1 month

**Platform:** Android Programming

**Languages:** Java, SQLite DB.

**Team Size:** 6 (six)

**Project Details:** This app acts as a guide for Mumbai. Any user would be able to visit the important tourist destinations of Mumbai via this app. According to users current location the user would be able to visit the defined tourist attractions. A user can select by which transportation medium they want to travel i.e. Local Train, Taxi, and Bus. This app will provide description of a particular destination including proper time to visit. According to the mode of transportation expected fare also provided.

**Role:** Team member.

**Responsibilities:**

- Database of the application.
- Designing of layouts.

**Project Title:** Advanced display board based on sensors

**Institution:** FET, RBS College

**Duration:** 6 month

**Platform:** Microcontroller

**Languages:** C

**Team Size:** 4 (four)

**Project Details:** The aim of our project is to build a LED display board which can display moving texts. This board will be controlled by using de-multiplexers, timers and microcontrollers. The heart of our project will be Microcontroller ATMEGA16. It will control the scrolling display of the LED matrix board. The board consists of some sensors which help it to make it different. There are follow-ing sensors used fire sensors, Temperature sensor & Humidity sensor.

**Role:** Team leader.

**Responsibilities:**

- Programming of ICs.
- Integration of all modules.
